

## Focus Correction Area Considerations

- No more than one mechanical FCA
  - Repeat FCA on consecutive writes for mastery
  - Retire FCA when 80% of class masters the FCA @ 80%
  - When 80/80 rule has been met, increase the level of difficulty to move students out of their comfort zones
- 
- 2 of 3 FCAs should be content related
  - At least 1 FCA should relate to the domain of writing
  - Should be easily understood by students
    - not too general
  - FCA should improve writing skill
  - FCA should be "easy" to correct -  
("Be creative" difficult to assess)
