LEGO MASTER BUILDER JR. NEW! NEW! NEW!

It takes years of practice, determination, patience, and dedication to become a Lego Master Builder. Your child is in luck though because we have worked tirelessly to perfect our Lego teaching technique – so much so that within six short weeks, your child will receive a certificate proving that they have completed their Master Builder Jr. training! Come join us as we explore and create our wildest imaginations. We will also re-create some real-world buildings, landscapes, feats of engineering, and Wonders of the World! We supply all Lego blocks and building guides for classes, but there will also be some time for free building during our classes if your child wants to bring in their own project. You will not want to miss out on all the excitement we have planned, register today to secure your spot!

Program cost: \$80.00

Instructor: Sports Zone 101

Dates: 9/16, 9/23, 9/30, 10/7, 10/21 (no class 10/14)

SEWING

New projects this year! Students will learn the basics of hand sewing and practice what they learn by making projects. Projects may include working with zippers, buttons or velcro as well as different types of material. Students will make several projects over the 5-week program including some type of stuffed project (stuffed animal or similar item). Students will be able to choose from several options for their stuffed project. Bonus projects will be available to students who complete the regular projects ahead of schedule. Repeat students are always welcome. **Please keep in mind, each session is different so if you did a previous class this one will be different than the last one.**

METROCRAFT **NEW! NEW! NEW!**

Students learn economics, civics, geometry, history and technology as they work together to create a city within a virtual *Minecraft* world. *Minecraft* is a limitless platform for students to learn academic skills in a highly engaging virtual environment. In this problem-solving class, students design their own house and business as they learn about budgeting, profit and loss and supply and demand. As they serve on a city council, they study how laws are made and work together to create and vote on a city constitution of laws. Students use mathematics and geometry to construct a working urban environment.

STEM skills have never been so fun!

KIDS TEST KITCHEN

Kids' Test Kitchen is on a mission to get young eaters cooking, tasting, and thinking about healthy ingredients! Let's continue to *redefine kid food*; one lesson, and one child at a time! Each class presents students with an opportunity to explore new or familiar foods in their raw, unmanipulated state. Then, working as a team, we'll slice, dice, peel, measure, and cook until we've prepared the finished dish. Lessons are planned to celebrate seasonal produce – warm you on a brisk Fall day and offer ideas for quick and healthy family meals. At the end of class your aspiring chef will receive the main ingredient, or a sample of the finished dish, and the recipe so that they can show off what they've learned! Even the most reluctant eaters enjoy KTK, where participation is expected, but tasting is *always* optional. *Each session arrives with fresh new recipes and ideas to inspire your healthy eater!* Kids have food allergies, but they shouldn't miss out on the fun. We know allergies and can work around them, making sure that everyone is having fun and staying safe. **Please clearly disclose all food allergies and/or dietary restrictions upon registration.* www.facebook.com/kidstestkitchen/
